## COLON HYDROTHERAPY

Colon hydrotherapy is the introduction of warm filtered water into the colon, effectively removing waste material. This results in a healthy digestive environment, encouraging the growth of healthy bacteria.

Generally our digestive systems are overworked and sluggish due to overeating, medications, fast foods, processed and GM foods, toxins, alcohol consumption and, stress. This contributes to poor digestion which can result in excessive gas, bloating, constipation or diarrhoea.

Colon hydrotherapy cleanses your colon, detoxes the body and reduces digestive discomfort, it also helps minimize the chances of bowel cancer forming.

It can assist in a range of issues including constipation, bloating, flatulence, depression/anxiety, poor skin health, infertility, weight management, low immune systems, disturbed sleep, IBS/Crones and concentration problems.
